SUMMARY

Software Engineering student with 2+ years' experience turning product requirements into working software across web, cloud, and AI-related projects. Worked in Australian and international team environments, contributing to both product features and client-facing solutions.

EXPERIENCE

DeepSesh Melbourne, Australia
Co-Founder, also as Software Engineer Mar 2026 – Present

- Planned on early-stage startup development, system scaling, core business-focus products and dev teamwork distribution.

Total Game Development Melbourne, Australia
Software Development Intern (Onsite - Contract) Dec 2024 – Mar 2025

- Developed C++ features for a game project, including unit creation, rendering, movement logic, and pathfinding.
- Worked closely with the project manager and digital media team to clarify requirements, align technical work with design goals, and support smooth feature delivery.

ABC Academy of Music (Canada) Melbourne, Australia
Backend Development Intern (Remote - Contract) Jul 2024 – Nov 2024

- Built Java Spring Boot microservices and CI/CD pipelines with Jenkins, improving modularity and reliability.
- Communicated progress and solution with client, strengthening presentation skills and supporting clearer project discussions.

Bamboo Technologies Guangzhou, China
Associate Software Engineer Intern (Hybrid - Full Time) June 2025 – Feb 2026

- Ranked 1st in a PL-900/PL-200 aligned bootcamp capstone by building a Power Platform banking app with role-based access and maker-checker workflows.
- Built a retrieval-based knowledge system for an enterprise client, improving document handling, classification, and grounded response generation.
- Developed policy Q&A solution using SharePoint, improving response quality through prompt and retrieval tuning.
- Built a customer persona proof of concept that read Dataverse data, generated summaries and structured results.
- Contributed to an invoice-processing pipeline that extracted structured data from varied document formats using document understanding models and post-processing workflows.
- Prototyped a real-time speech-to-form assistant that summarised spoken input and populated structured fields.

Guangdong Jianke Innovation Technology Research Institute Co., Ltd. Guangzhou, China
Software Engineer Intern (Onsite - Full Time) Jul 2023 – May 2024

- Developed Spring Boot applications, implementing business logic and task scheduling to enhance maintainability.
- Engineered efficient data access layers with MyBatis Plus, achieving improved database query performance.
- Enhanced response performance of 20+ Java RESTful APIs, significantly improving user experience.
- Identified and resolved over 120 security, performance, and usability defects, reducing user-reported issues by 50%.
- Integrated and developed 7+ Vue.js frontend components, seamlessly connecting them with backend Java APIs for smooth data manipulation and user interaction.

EDUCATION

UNIVERSITY OF MELBOURNE Expected Dec 2027

- Master of Software Engineering

ROYAL MELBOURNE INSTITUTE OF TECHNOLOGY UNIVERSITY Dec 2024

- Bachelor of Software Engineering

SKILLS

Language	Java, Python, JavaScript, TypeScript, C++, SQL, Dart
Frameworks	Spring Boot, JPA/Hibernate, MyBatis, Flask, Django, Express.js, React, Next.js, Vue.js, Flutter
Cloud / Data	Azure AI Foundry, Azure Blob Storage, AWS DynamoDB, Copilot Studio, Cosmos DB, Dataverse, Google AI Studio, MySQL, MongoDB, PostgreSQL, SharePoint, SQLite
System / Tools	AWS EC2, Docker, GitHub Actions, Jenkins, Linux, Ubuntu
Areas	Full Stack Development, RAG systems, NLP, AI Document Processing, API design, CI/CD, Scrum

CERTIFICATION

IBM: Full Stack Software Developer Professional Certificate (V5), Generative AI: Elevate your Software Development Career
Microsoft: AI-900, PL-900, Copilot Studio Agent Academy - Recruit & Operative, Applied Skills: Build a generative AI chat app

LANGUAGES

English, Cantonese, Mandarin
